

CWHT
Construction Workers
Health Trust

**on-site
health screening
for your workers**

**Low Cost -
Big Benefits**

The Construction Workers Health Trust provides on-site health screening to its members throughout the country.

We test blood pressure, cholesterol, lung function, Body Mass Index and diabetes.

Last year we screened over 6000 workers on building sites in Ireland and almost 2000 of them were referred to their own GPs for further treatment.

Why do Building workers need health screening?

Take a look at the following stats.

43% of building workers smoke.

44% are overweight.

15% have high blood pressure

21% have high cholesterol

Does that sound like a healthy industry to you?

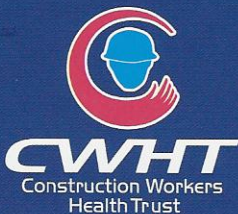

If you take HEALTH as seriously as you do SAFETY you should at least consider making a bi-annual health check available to your workers.

How do I arrange health screening?

Easy. If your firm participates in the Construction Workers Pension Scheme, you can also pay the weekly Health Trust/ Benevolent Fund levy of €1.50, by phoning CPAS on 01-4977663 or email info@cwps.ie. and asking them to commence invoicing you the additional charge along with your pension payment.

If not, you can register directly with us by completing the simple application form. The cost is based on your average number of workers at the rate of €75 per worker per year. Payment is charged just once per year in advance and entitles your firm to arrange a bi-annual health screening for your employees.

Sign Up Form

Please enroll our company for Health Screening.

We employ on average no employees.

Please invoice us for the appropriate annual charge which is payable in advance.

We understand that employee health screening is entirely voluntary and all test results are strictly confidential between the worker and the health screening provider.
